

About Datakit

Datakit, leader in the CAD data exchange market, provides converters, plug-ins and libraries to import and export many CAD formats.

Datakit supports a wide range of geometrical and semantic data (assemblies, annotations, metadata...) through its diversified product range. It offers also CAD migration services and works closely with software companies by providing components.

Datakit figures

- 29 employees, 22 engineers in research & development.
- More than 100 Independent Software Vendors partners.
- 80% of turnover abroad.

Offices and resellers

Datakit has offices in France, based in Lyon, Marseille and Carcassonne.

The company is established worldwide through a network of efficient resellers.

Companies equipped

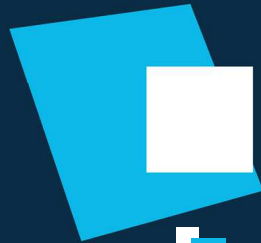

- Software companies in CAD, CAM, Dental, Control, BIM, Metrology...
- Industrialists in Aerospace & Defense, Automotive, Engineering, Molds & Tools, Consumer Products, Mechanical, Medical, Motor Sports, Special Machinery, Sporting Goods...
- Design offices.
